

I am a seasoned, full-stack software engineer who is capable of building whole platforms from scratch, scaling systems up, building teams, and shipping reliable applications. Just tell me what you need, I get the things done.

## Experience (5 years)

### Senior Full Stack engineer

[Surbans](#)

Sep 2023 – Present

Remote

Malaga, Spain

Full-time

- **Stack: TypeScript, React Native, Kotlin, Swift, Svelte.js, Firebase, GCP, Docker, MongoDB, Stripe, Gitlab Runners**
- Led efforts in automating deployments using CI/CD pipelines, implementing microservices, resulting in a significant reduction of wasted productive hours, saving approximately 500+ hours per year and \$20K + in annual costs.
- Architected the full software stack for 4 individual projects, ensuring adherence to best practices and software standards, resulting in robust and scalable applications.
- Conducted interviews and provided mentorship to a team of 5 junior/mid-level developers, fostering their technical growth and ensuring the successful delivery of projects.

### Senior Full Stack engineer

[Sarbon](#)

March 2025 – Aug 2025

On-site

Tashkent, Uzbekistan

Contract

- **Stack: Next.js, React Native, Flutter, Golang, Grafana, Sentry, Docker, MongoDB, PostgreSQL, Redis, Github CI**
- Mentored engineers in optimizing existing codebase, leading to a 2X increase in application and website performance, enhancing user experience and satisfaction.
- Collaborated with cross-functional teams to write clean and well-documented code using a diverse set of programming languages including TypeScript, C++, Java, Swift, Ruby and Golang
- Actively participated in architectural discussions, code reviews, and sprint planning sessions, contributing to the overall improvement of team productivity and code quality.
- Played a key role in resolving technical challenges and providing innovative solutions, ensuring the timely delivery of high-quality software products.

### Senior Full Stack engineer

[Giftlist](#)

Aug 2024 – March 2025

Remote

California, US

Contract

- **Stack: React.js, React Native, Next.js 15, Nest.js, Typesense, Zyte, Github CI, Docker, Looker Studio, Devin AI**
- Integrated React Server Components for critical paths (e.g., SEO-heavy pages), reducing client-side JS bundle by 40% and improving Lighthouse scores to >95, cut monthly analytics costs by \$1,200 by replacing redundant analytic tools
- Architected a monorepo with Yarn Workspaces to share codebase (e.g., API types, auth logic, UI elements) between Next.js web and Ionic React + Capacitor mobile app, cutting duplicate code by 80%
- Rewritten legacy scraping logic with custom algorithm - 85% code reduction (3K→500 LOC) and 7x (22.5 -> 3s) in TTI
- Optimized product full-stack application to scrape products in over 5K type of marketplaces for 200K MAU
- Reduced monthly cost of search-as-you-type functionality in Typesense from \$200/month to \$5/month
- Optimized scraping endpoint response time from 8-240 to 4-10 seconds with 99.5% of accurate data fetching

### Team Lead, React Native/Golang engineer

[UranMusic](#)

May 2023 – Sep 2023

Remote

Moscow, Russia

Contract

- **Stack: React Native, Swift, Golang, Github CI, XCode Cloud, Firebase, Sendgrid, E2E Testing, Integration Testing**
- Conducted interviews for 3 senior-level team members on company policy and workflow.
- Carefully designed, tested and implemented user interfaces according to App Store/Google Play guidelines.
- Developed and maintained technical documentation and guidelines related to software processes and systems, including requirements and design documentation.
- Architected the effective Golang microservices architecture for server application following the best practices.

**Team Lead, React Native/Swift engineer**[Givento](#)**Apr 2022 – May 2023**

On-site

Tashkent, Uzbekistan

Full-time

- **Stack:** TypeScript, Next.js, Nest.js, React Native, Swift, Stable Diffusion, ChatGPT API, Python
- Conducted interviews for 3 mid/senior-level team members, collaborated with them on code reviews and sprints
- Architected full-cycle of auto deployments reducing overall amount to 9 minutes for each android and iOS apps
- Authored custom hooks, component based architecture and reduced code overuse by 15% which resulted decreased TTI time by 2.3 seconds and overall app performance by 2X

**Team Lead, React/React Native engineer**[Smartbooking](#)**Nov 2021 – Apr 2022**

On-site

Bukhara, Uzbekistan

Full-time

- **Stack:** TypeScript, React.js, Angular, RTK Query, React Native, Express.js, Nest.js, Nginx, Firebase Analytics, SEO
- Implemented various sorting algorithms to get +100 hotels data which resulted in 35% increase in app performance.
- Refactored heavy libraries by implementing custom ones to reduce the app size from 65 MB to 25 MB.

**Middle React/React Native engineer**[VEProf](#)**Jan 2021 – Dec 2021**

Remote

Wyoming, USA

Full-time

- **Stack:** TypeScript, React.js, Redux Toolkit, React Native, Python, Stripe, Firebase, Push/Local Notifications
- Integrated payment gateway with Stripe and local/remote notifications with Firebase
- Contributed to the in-house UI library that saved +180 hours of development per month

**Front-end engineer**[Pirodon](#)**May 2020 – May 2021**

Remote

Moscow, Russia

Full-time

- **Stack:** jQuery, Bootstrap, Express.js, Firebase, Cloudflare Pages, Yandex Metrica
- Implemented full-stack platform solution with React, Redux, Express.js for fireworks' marketplace for +5K MAU.
- Effectively carried products and processes from concept to completion.

**Education & Certifications**

- 
- **Full Stack Engineer Career Path**, Codecademy **2021**

**Skills**

- 
- Leadership, teamwork, accountability, people/time management, adaptiveness, critical thinking

**Tech**

- 
- **Languages:** JavaScript, TypeScript, Golang, Java, Kotlin, Swift, Objective-C, C++
  - **Technologies:** HTML, CSS, Webpack, React/React Native, Angular, Vue, Express, Nest.js, REST/GraphQL, gRPC
  - **DB/Cloud:** Postgres, MySQL, MongoDB, Redis, AWS, GCP, Firebase
  - **CI/CD:** Git, Bash, Makefile, Fastlane, Github Actions, Gitlab Runners, XCode Cloud, Docker
  - **Tools:** Vim, VS Code, Android Studio, XCode, Testflight, App/Play Store, Gradle, Cocoapods, Swiftgen,scrcpy
  - **Management:** Trello, Jira, ClickUp, Taskade, Zapier, Notion,
  - **Other:** Automation, DevOps, Data structures and algorithms, Design Patterns

## Commercial projects (mobile apps)

Co-operative bank - [Google Play](#) | [App Store](#) | [Website](#)

## Personal projects

---

- [SeniorTips](#) - technical blog where I share my knowledge, experience and give career advice to engineers
- [React Native community](#) - technical group which I started back in 2021 when I had no one to ask for about the errors I was facing with React Native, I did 10 workshops, now more than 200 people help each other to become better developer
- [Savat](#) - I love keeping track of grocery prices. But there's no centralized data for that. So I decided to build one.
