

Bek Roz

Co-Founder & Lead Engineer · Full-Stack and Mobile Product Delivery

bek@bekroz.com · bekroz.com · LinkedIn · GitHub · Telegram

Software engineer with 6+ years of experience building web, mobile, and backend products. Delivered 40+ projects for 30+ clients, with a focus on architecture, performance, reliable releases, and leading teams from product discovery through launch and support.

EXPERIENCE

Co-Founder, Lead Engineer · JDS Solutions

Jan 2026 – Present

Co-founded a product engineering company and lead a team of 7+ people. Delivered 10+ projects end to end, covering discovery, architecture, implementation, release, and ongoing support. Own technical direction, code quality, delivery planning, and client communication.

Stack: Flutter, Dart, React, TypeScript, Golang, Supabase, Cloudflare, OpenAI API, CI/CD

Senior Full-Stack Engineer · Surbans

Oct 2023 – Dec 2025

Architected full stacks for four products, led architecture and code reviews, and mentored five engineers. Improved performance in core areas and automated delivery workflows across the team.

Stack: TypeScript, React Native, Kotlin, Swift, Firebase, GCP, Docker, MongoDB, Stripe

Senior Full-Stack Engineer · Sarbon

Mar 2025 – Aug 2025

Worked across logistics web, mobile, and backend systems. Mentored engineers, improved application performance, and contributed to architecture, code reviews, and release delivery.

Stack: Next.js, Flutter, Golang, Grafana, Sentry, Docker, MongoDB, PostgreSQL, Redis, GitHub Actions

Senior Full-Stack Engineer · GitMax

Mar 2024 – Mar 2025

Scaled marketplace scraping for 200K+ monthly active users across 5K+ marketplaces. Reduced search costs and brought scraping latency down to roughly 4–10 seconds.

Stack: React, Next.js, NestJS, Typesense, Zyte, Docker, GitHub Actions

Lead Mobile Engineer · UranMusic

May 2023 – Oct 2023

Led mobile engineering with React Native and native Swift/Kotlin, reviewed releases for store requirements, helped hire senior engineers, and designed Golang backend services.

Stack: React Native, Swift, Kotlin, Golang, Firebase, GitHub Actions, Xcode Cloud

Earlier roles · Startup Studio, SmartBooking, VEProf, Pirodon

2020 – 2023

Led frontend and mobile work, built component libraries and CI/CD pipelines, integrated payments and notifications, and improved application reliability and performance.

Stack: React, React Native, TypeScript, NestJS, Firebase, Fastlane, Sentry

TECHNICAL STRENGTHS

Product engineering: Architecture, end-to-end delivery, performance, code review, team leadership, and release automation.

Web and mobile: Flutter, Dart, React, Next.js, TypeScript, React Native, Swift, Kotlin.

Backend and infrastructure: Golang, NestJS, Supabase, PostgreSQL, MongoDB, Cloudflare, GCP, Docker, GitHub Actions.

EDUCATION & CERTIFICATION

Full-Stack Engineer Career Path · Codecademy, 2021

SELECTED PRODUCTS

Savat · Shopping and local commerce platform

Web · iOS · Android

Built customer shopping and price discovery across local markets, including search, carts, orders, and delivery or pickup flows.

Stack: Flutter, Dart, Riverpod, Golang, MongoDB, Supabase, Next.js, Docker, PostHog

[Website](#) · [App Store](#) · [Google Play](#)

Savat Seller · Merchant operations

iOS · Android

Merchant app for catalog, stock, branches, active orders, order handoff, and sales insights.

Stack: Flutter, Dart, Riverpod, Dio, Firebase, PostHog

[App Store](#) · [Google Play](#)

Savat Go · Courier delivery

iOS · Android

Courier app for delivery offers, route guidance, pickup and handoff, and run tracking.

Stack: Flutter, Dart, Riverpod, Dio, Yandex MapKit, Firebase, PostHog

[App Store](#) · [Google Play](#)

Azabis · Hotel concierge

Web · Mobile

Multilingual guest and reception workspace with QR access, service requests, and an AI concierge.

Stack: React, TypeScript, Vite, Cloudflare Pages, Supabase, OpenAI API, Flutter

[Website](#)

Marquee · Valuation CRM

Web

Custom CRM tailored to valuation and financial consulting workflows and client needs.

Stack: TypeScript, Vite, Cloudflare R2, OpenAI API

[Website](#)

Goozal AI · Skincare companion

Web · Mobile · Telegram

Privacy-focused AI skincare companion with cosmetic analysis, routines, and progress tracking.

Stack: Flutter, Dart, Riverpod, Supabase, OpenAI API, Next.js, React, Cloudflare

[Website](#) · [Telegram bot](#)

Sokin Masjid · Prayer-time quiet mode

iOS · Android

Prayer-time and mosque-aware quiet mode with offline mosque discovery. Android automates Do Not Disturb; iOS provides reminders and nearby mosque guidance.

Stack: Flutter, Dart, Android, iOS, OpenStreetMap
